Call for nominations EFCE Excellence Award in Recognition of an Outstanding PhD Thesis on CAPE 2024

The European Federation of Chemical Engineering (EFCE) is pleased to announce the call for nominations for its prestigious **Excellence Award in Recognition of an Outstanding PhD Thesis on CAPE**. Launched in 2006, this biennial award has been instituted to recognise a PhD thesis which demonstrates an outstanding contribution to research and/or practice in computer-aided process engineering (CAPE) or process systems engineering (PSE).

The award consists of a cash prize of 1,500 EUR and a certificate, and will be presented to the winner at a plenary session during the ESCAPE34-PSE24 conference to be held in Florence, Italy, on 2-6 June 2024. The award also comprises a travel grant of up to 500 EUR and the ESCAPE registration cost. Furthermore, the successful candidate will be invited to make a presentation at the ESCAPE-PSE conference and to prepare a paper for publication as a "guest paper" in *Computers & Chemical Engineering*.

Any PhD thesis supervised at a university or PhD-awarding institution of an EFCE member country in computer-aided process engineering (CAPE) or process systems engineering (PSE) is eligible for nomination. The candidate's thesis must have been defended after 1 January 2021.

The closing date for nominations is **31 December 2023**.

The Award is generously sponsored by
AVEVA Software LLC

Further information about the nomination procedure, eligibility, supporting documentation, etc., can be obtained from the EFCE website at <https://www.efce.info/ExcellenceAwardCAPE.html> .

AVEVA Software LLC

AVEVA is a British multinational information technology consulting company headquartered in Cambridge, England.

AVEVA - the world's leading engineering software provider to the plant, power and marine industries for over 45 years. AVEVA is one of the world's most innovative companies for pioneering sustainable technologies. In this decade AVEVA has helped engineers factor greenhouse gas reduction into plant designs, optimize their solar energy production, operate remotely, and achieve net zero goals using AI and industrial data sharing. About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
