EFCE calls for nominations in the field of Mixing

The European Federation of Chemical Engineering (EFCE) and its Working Party on Mixing are pleased to announce the call for nominations for two of its awards – the Lifetime Recognition Award and Young Researcher's Award.

The Lifetime Recognition Award is given every three years to a member of the EFCE member countries in recognition of his/her outstanding contribution to mixing science and technology in Europe. The award is sponsored by the BHR Group and comprises of a plaque/certificate and a cash award of €1,500.

The Young Researcher's Award was established in 2000 to recognise the work of a young researcher in his/her early career, which demonstrates an outstanding contribution to research and/or practice in mixing. The award is sponsored by EFCE and consists of a certificate, cash prize of €1,500 and a travel grant. Any researcher under the age of 35 who has completed his/her PhD in the field of mixing at a European university and is currently active in mixing research is eligible for nomination.

Both awards will be presented at the 15th European Mixing Conference which will be held in St. Petersburg, Russia between 28 June and 3 July 2015.

Closing date for nominations: **20 January 2015**

For further information about the nomination procedure, eligibility and supporting documentation, please refer to the website of the EFCE Working Party on Mixing: <http://wp-mixing.inp-toulouse.fr/en/awards.html>

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
