Call for Nominations 2016 EFCE Distinguished Lecture in Thermodynamics and Transport Properties

The European Federation of Chemical Engineering (EFCE) announces a call for nominations for the biennial Distinguished Lecture in Thermodynamics and Transport Properties to recognize an outstanding research career and achievements within the field.

The award will comprise a certificate, a cash prize of EUR 1,500, a travel/accommodation grant (not exceeding EUR 500) and fee waiver to attend the 14th International Conference on Properties and Phase Equilibria for Product and Process Design (PPEPPD) where the award will be presented.

The 2016 Distinguished Lecture will be delivered during a Plenary Session of the 14th PPEPPD Meeting which will be held in Porto, Portugal, from 22 to 26 May 2016.

The closing date for nomination is extended to **1 August 2015**.

Further information about the nomination procedure, eligibility, and supporting documentation can be obtained from the EFCE Working Party on Thermodynamics and Transport Properties website at <http://www.wp-ttp.dk> or via EFCE's website at <http://www.efce.info/Distinguished+Lecture+in+TTP.html>.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
