Call for Nominations

EFCE Excellence Award in Mechanics of Particulate Solids 2019

Following the successful calls for nominations in 2009, 2012 and 2015, the European Federation of Chemical Engineering (EFCE) is pleased to issue a fourth invitation call for nominations for the **Excellence Award in Mechanics of Particulate Solids**. This triennial award aims to recognise a PhD thesis or associated paper(s) of a researcher or engineer, which demonstrate(s) an outstanding contribution to research and/or practice in Mechanics of Particulate Solids.

This year, the award is sponsored by **Jenike & Johanson Inc.**, a leading supplier of powder and bulk solids handling, processing, and storage technology.

The award will be made at the International Congress on Particle Technology, PARTEC 2019, to be held in Nuremberg, Germany, from 9 to 11 April 2019. It consists of a certificate, a cash prize worth €1500, plus a travel grant and free registration to the conference. The winner will be invited to give a presentation following the award ceremony.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE member country or by a member of an EFCE member society. The nominated PhD thesis or paper(s) must address a topic relevant to the field of Mechanics of Particulate Solids. Only PhD theses or paper(s) published between November 2015 and November 2018 are eligible for nomination.

Closing date for nominations: **30 November 2018**.

Further information about the nomination procedure, eligibility, supporting documentation, etc., can be obtained from the EFCE website at <http://www.efce.info/ExcellenceAwardMPS.html>.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering. See www.efce.org

About the sponsor

Jenike & Johanson Inc. is a leading supplier of powder and bulk solids handling, processing, and storage technology. Over the past 55 years, the company has tested over 13,000 unique powders and bulk solids and worked on more than 7,500 projects, giving their team the broadest real-world and in-depth experience in the industry to address a wide variety of bulk material handling and engineering needs.
